ABOUT ME

I am a dedicated and enthusiastic fullstack web developer with a strong foundation in frontend and backend technologies.

My journey in the world of web development began with HTML, CSS, and JavaScript, and has since expanded to include Node.js for backend development. The art of crafting clean and user-centric web experiences fascinates me.

SKILLS

- Proficient in HTML, CSS, JavaScript, and Bootstrap for frontend development.
- Implemented backend logic and data management using Node.js.
- Designed and developed user interfaces that prioritize user experience and accessibility.
- Applied responsive web design principles for optimal functionality across various devices.

EDUCATION

Bachelor of Computer Science

Agriculture University Peshawar

2021-2025

EXPERIENCE

Projects

Blogs Website

- Created a dynamic blog website using HTML, CSS, JavaScript, and Bootstrap.
- Implemented a user-friendly interface for writers to publish stories and readers to explore content.
- Developed backend functionalities using Node.js to manage data storage and retrieval.

Real Estate Platform

- Collaborated independently to design and develop a real estate platform for property transactions.
- Implemented frontend components with HTML, CSS, and JavaScript, focusing on user experience.
- Utilized Node.js and MongoDB for backend to handle data management and user authentication.

Anonymous Secrets Sharing

- Conceptualized and executed an anonymous secrets sharing application, emphasizing user privacy.
- Designed and implemented the frontend for seamless user interaction and content submission.
- Demonstrated proficiency in responsive web design principles for optimal cross-device usage.
